

FREE HEP C CHECK — IT STARTS WITH ONE PHONE CALL

Think you may have Hep C?

Call us first.

One private phone call. If you qualify, **we order your free blood work for you** and we **pay you by e-transfer** for doing it.

You may qualify if you ever:

Not sure? Call anyway — we'll ask a few private questions and tell you.

Used needles (IV drugs)

Shared syringes, spoons, or washes — even once, even years ago.

Liver inflammation

If past blood work showed it, our team will confirm it.

Previously had Hepatitis C

Still sharing pipes, stems, or drug equipment daily? Your risk of getting it again is much higher.

Spent time in jail

1 in 10 people inside have been exposed — fights, shared razors, etc.

Good to know: we review blood work you already have and consider other factors. Not everyone will qualify for testing, but it's always a good idea to find out if you have high risk factors.

Already know you have Hep C?

If your blood work is **less than 6 months old**, you may already qualify.

\$40

E-TRANSFER

...for doing your blood work

Results take about 2 weeks. Just call us back to confirm your results by phone — then the \$40 e-transfer is yours.

\$400

E-TRANSFERS

...if your test is positive

5 × \$80 payments — one for each check-in you report through our program. Treatment is free — and it cures Hep C.

1

Call us

A few private questions to see if you qualify.

2

We order your test

Free blood work — we set everything up for you.

3

Do the test

Results come back in about 2 weeks.

4

Call for your results

\$40 e-transfer — if positive, 5 × \$80 payments.
